ROLEX

GENERAL SAFETY ANTI COVID-19 MEASURES FOR BIENNALE ARCHITETTURA 2021*

La Biennale di Venezia is following the evolution of the ongoing Coronavirus health emergency with the greatest attention and, in accordance with the competent authorities, has prepared an anti-Covid-19.

Temperature checking

The main accesses of Arsenale and Giardini Exhibition area, is equipped with thermo scanners measuring temperature of the visitors before entering the premises. According to the Anti Covid-19 protocols, no one having 37.5°C or more as temperature must be allowed to enter.

Hands Sanitation

Visitors have to use hydroalcoholic solutions for washing hands, before entering the Exhibition venue.

Compulsory Masks

Masks have to be used during the visit and in all indoor and outdoor spaces.

Social distancing inside the venues

A protocol implying social distancing is in place for all activities: walk-in installations, meetings and seminars, bookshop, bar and restaurants etc. This reduces the number of visitors allowed inside the exhibition venues in order to guarantee the safe distance needed. Inside the venues and during the visit people have to keep the social distancing defined in at least 1 meter.

Entrance and exit

All the venues hosting the International Exhibition, the Collateral Events and all the National Pavilions guarantee a separate entrance and exit system. There is a one-way exhibition route to minimize the possible clustering and gathering of visitors. In particular the Arsenale entrance is at Calle della Tana and the exit at Giardino delle Vergini, by means of Ponte dei Pensieri.

Tracing access and ticketing reservation

Ticketing to visit the Exhibition is exclusively online, in order to any queues and gathering of people. All visitors are traced inside the venue. The visit to the exhibition requests the reservation of the ticket and the access to the venue is guarantee to a limited number of visitors. The reservation procedure and the number of visitors is defined by La Biennale referring to the characteristics of the exhibition venue, the dimension of the internal routes, presence of accessible installation etc.

* measures adopted by the date 19.05
