

Biennale Cinema 2025
Repower Sponsor of the 82nd Venice International Film Festival - La Biennale di Venezia

The Swiss Group confirms its presence at the Lido for the fourth year with a widespread electric mobility ecosystem. Among the most anticipated innovations Lucietta, the first full-electric Venetian taxi. In the lagoon there will also be DINA, the family of e-bike charging racks, SYMBIOSIS, the charging tool for electric cars and boats, the LAMBROgino cargo bike, and the E-LOUNGE bench, designed to offer comfort and smart charging

Venice, July 22, 2025 - Repower, international company operating in the energy and mobility business, is renewing its support for the 82nd Venice International Film Festival - La Biennale di Venezia, taking place at the Venice Lido from August 27 to September 6.

Lucietta will be one of the protagonists of the 2025 edition: the first full-electric Venetian taxi boat, that embodies a new paradigm of electric nautical mobility, a perfect balance between historical identity, sustainability, and innovation. The boat will transport the protagonists of the Festival to the Lido, starting with the Jury and co-host Emanuela Fanelli. The iconic design, the innovative materials, the elegance, and the care taken in the project, make Lucietta an important milestone for Repower in the electric boating sector, confirming the Group's commitment to promoting sustainability in the tourism sector.

The new Repower boat is integrated into the Repower e-mobility ecosystem, which will be replicated at the Lido, making it the most advanced laboratory for sustainable mobility for ten days. Lucietta will indeed be charged by SYMBIOSIS, a versatile and modular tool, the cornerstone of the new national charging network, Repower Charging Net.

In front of the Palazzo del Cinema and at other points on the Lido, several E-LOUNGE benches will be installed: these e-bike charging benches also allow users to connect electronic devices and access Wi-Fi thanks to the integrated hotspot. A true design object, it was awarded the *Compasso d'oro ADI* prize in 2020. The LAMBROgino cargo bikes, also a *Compasso d'oro* winner in 2022, will be made available to the co-host and other selected protagonists of the Venice International Film Festival.

Repower's mobility ecosystem will be completed with three DINA units, the e-bike racks that can accommodate five bikes and charge three. These will be installed at various points across the Lido. This way, the Lido will become part of DINAcub, the project through which Repower is electrifying Italy's cycling routes.

"We are proud to support the Venice International Film Festival again this year. We want to do so by bringing our concrete commitment to forms of mobility that are already concrete, reliable, and safe alternatives to internal combustion vehicles and their limitations. I'm not just referring to Lucietta, the latest arrival, through which we want to boost electric boating in Venice. We want to offer the many guests and tourists the chance to move around the Biennale venues in an alternative and sustainable way. We are living in an era of great transformations that demand a rethinking of our mobility models. Major international events like the Biennale almost have a responsibility in this landscape: to also be a concrete opportunity to convey more sustainable lifestyles and solutions"
commented Fabio Bocchiola, CEO of Repower Italia

Repower Group

The Repower Group, active in the electricity sector for over 100 years with its headquarters in Poschiavo (Canton Graubünden), is among the leading Swiss operators in renewable energy generation. It operates on the main European electricity exchanges as well as across the entire Swiss and Italian energy markets. Repower is present throughout the sector's value chain, and sustainability has always guided its activities, from generation to all the value-added services offered to its customers. Since 2002, Repower has also been active in Italy, where it exclusively serves businesses. In 2024, Repower Italia generated a turnover of 1.45 billion euros (value calculated according to Swiss GAAP principles) out of a total of approximately 2.609 billion generated at the Group level. Innovation is the hallmark of Repower's approach to the Italian market, where it boasts a rich portfolio of services and products: from electricity and gas supplies to energy efficiency and electric mobility.
